

Statement from New Jersey Gasoline and C-Store Association Executive Director Sal Risalvato in response to today's Monmouth University poll:

We're gratified that the highly regarded Monmouth University Poll asked the right question, unlike the previous Rutgers/Eagleton poll whose results on this issue were misleading. The Monmouth poll mirrors our own internal polling that shows the majority of New Jerseyans support self-serve gas as long as the option of full-service remains, which was always part of the recently introduced legislation. We hope this poll helps lawmakers better understand that New Jerseyans do support self serve and we urge them to begin acting on the legislation in the coming weeks.
